

WATER SUPPLY & SEWAGE HOLDING TANKS

Event RV Rental

Volume 1, Issue 1

How can I use water in my camper?

WATER: your camper will have two options for water. **City water:** This is where you can hook up a garden hose to the camper thus giving you an unlimited water supply. When you are hooked up to city water you will not need to use the camper's on board water pump. **On Board Potable Water Tank:** Just about every Motor Home, 5th wheel, travel trailer, expandable travel trailer

and pop-up camper made today has an on board fresh water tank. the average tank size is between 30-50 gallons. To dispense water from the tank, you will have to turn on the water pump. There is usually a red LED 12V switch somewhere in the camper that will turn the water pump on and off. When turned on the pump will pressurize the entire plumbing system with water to the fixtures. The on board water pump is a 12V powered pump that can run on battery will be converted to 120V when the camper is plugged

into shore power.

run water you will have to have battery power or shore power to run the electric water pump.

JOSH'S WATER SUPPLY CAN REFILL YOUR TANK IF YOU NEED MORE WATER CALL HIM AT (920) 213-6124

Special points of interest:

- NEVER DRINK YOUR POTABLE TANK WATER
- WATCH THE ON-BOARD MONITOR PANNEL TO KEEP TRACK OF YOUR WATER SUPPLY & SEWAGE LEVELS
- TURN WATER PUMP OFF WHEN YOU ARE NOT USING WATER
- CONSERVE POWER SO YOU HAVE ELECTRIC TO RUN YOUR PUMP.
- ALWAYS USE PLENTY OF WATER WHEN FLUSHING TOILET
- PUT TANK DEODORIZER IN TOILET TANK TO KEEP SMELL DOWN
- ONLY USE RV TOILET TISSUE OR SCOTT ONE PLY
- NEVER RUN YOUR PUMP WHEN THE TANK IS EMPTY

HOW DO WE GET OUR TANKS EMPTIED?

WASTE WATER & SEWAGE each event camping area has a procedure for having your holding tanks emptied. At Camp Scholler you will have to fill out a form which is located at the shower houses. the

form will describe your location. make note of the make and model and color of your camper. While you are away they will pump your tanks. keep an eye on your water levels and make sure to put in an order when

the tanks reach 3/4 full. At Sleepy Hollow Farms you will submit a request with the camp office near the entry roadway to the campground.
